LIVE HEALTHY WITH NATURAMA

WHO ARE WE?

Here at Naturama we look only for the freshest fruits and then harvest them only when they are at their peak of ripeness. All our juices and nectars are from fresh fruits from seasonal harvests—never from concentrates. This ensures that each and every product you receive is complete and full of all its healthy vitamins and antioxidants.

All our fruits and berries are hand picked from trusted European plantations including lemons from southern Italy and berries from Poland. Our selection process from only high quality products guarantees a natural, unique and delicious flavor. All Naturama products are minimally processed in order to retain their original nutritional and health composition.

WHY ARE WE DIFFERENT?

Naturama products compared with others are:

- ✔ 100% natural
- ✔ never from concentrates
- ✔ tastier
- ✔ aromatic
- ✔ highest in nutritional values

Our production process makes us stand out from others:

- Fresh fruit and berries are pressed immediately after harvesting because doing so guarantees the unique flavor of our products. We never freeze or store our fruit and berries.
- All our products come only from trusted and reliable plantations with whom we've had a long working relationship.
- Instead of using industrial filters like others producers, we only use wicker inserts to filter our juices and nectars. This is how we know that none of the valuable ingredients are lost during the filtering process.
- Our pasteurization process is carried out 70 degrees Celsius for 60 minutes. This ensures that all levels of vitamins and minerals from the fruits and berries are maintained and their shelf life extended to 18 months.

WHAT WILL YOU EXPECT?

By choosing Naturama products, you will expect:

- ✔ reduced cholesterol
- ✔ beneficial properties from fiber
- ✔ purified wealth of nutrients
- ✔ excellent metabolism from pectin
